Energy-Saving, Moisture-Resistant XPS Insulation

Cavity Wall Insulation
CW15: ASTM C578 Type X, 15 psi minimum
CW25: ASTM C578 Type IV, 25 psi minimum

Description
Designed for masonry cavity wall applications, FOAMULAR® extruded polystyrene (XPS) insulation is virtually impervious to moisture. This moisture-resistant property—along with its high R-value, light weight, competitive price and wide range of sizes—makes it ideal for use in a cavity wall system. Pre-cut 16” wide boards yield fast, labor-saving installation.

Key Features
- Excellent long-term stable insulating performance of R-5 1/3 per inch.
- Exceptional moisture resistance, long-term durability
- Limited lifetime warranty — maintains 90% of R-value and covers all ASTM C 578 properties
- The only XPS foam with certified recycled content—certified by SCS Global Services to contain a minimum 20% recycled content
- Will not corrode, rot or support mold growth
- Zero ozone depletion potential with 70% less global warming potential than our previous formula
- Reusable
- Lightweight, durable rigid foam panels are easy to handle and install
- Easy to saw, cut or score
- Not for use in roofing. For roofing applications, use FOAMULAR® THERMAPINK® XPS insulation

Technical Information
This product is combustible. A protective barrier or thermal barrier is required as specified in the appropriate building code. For additional information, consult MSDS or contact Owens Corning World Headquarters at 1-800-GET-PINK®.

All construction should be evaluated for the necessity to provide vapor retarders. See current ASHRAE Handbook of Fundamentals.

FOAMULAR® insulation is a non-structural material and must be installed on framing which is independently braced and structurally adequate to meet required construction and service loading conditions.

Standards, Codes Compliance
- Meets ASTM C 578 Type X (CW15) and Type IV (CW25)
- UL Classified. A copy of UL Classification Certificate U-197 is available at www.foamular.com
- See UL ER881-01 at UL.com
- Meets California Quality

FOAMULAR® CW15/CW25
Extruded Polystyrene (XPS) Rigid Foam Insulation

Product Data Sheet

Standards; HUD UM #71A

• Compliance verification by RADCO (AA-650)

Certifications and Sustainable Features of FOAMULAR® XPS insulation

• FOAMULAR® XPS insulation is reusable

• FOAMULAR® XPS insulation is made with a zero ozone depletion formula

• Certified by SCS Global Services to contain a minimum of 20% recycled content

• Certified to meet indoor air quality standards under the stringent GREENGUARD Certification Program, and GREENGUARD Gold Certification Program

• Approved under the Home Innovation Research Labs NGBS Green Certification Program

• Utilizing FOAMULAR® XPS insulation can help achieve green building certifications including the U.S. Green Building Council’s Leadership in Energy and Environmental Design (LEED®) certification

• FOAMULAR® XPS insulation may qualify for The Buy American provision of the American Recovery and Reinvestment Act (ARRA)

1. Properties shown are representative values for 1" thick material, unless otherwise specified.
2. Modified as required to meet ASTM C 578
3. R means the resistance to heat flow; the higher the value, the greater the insulation power. This insulation must be installed properly to get the marked R-value. Follow the manufacturer’s instructions carefully. If a manufacturer’s fact sheet is not provided with the material shipment, request this and review it carefully. R-values vary depending on many factors including the mean temperature at which the test is conducted, and the age of the sample at the time of testing. Because rigid foam plastic insulation products are not all aged in accordance with the same standards, it is useful to publish comparison R-value data. The R-value for FOAMULAR® XPS insulation is provided from testing at two mean temperatures, 40°F and 75°F, and from two aging (conditioning) techniques, 180 day real-time aged (as mandated by ASTM C 578) and a method of accelerated aging sometimes called “Long Term Thermal Resistance” (LTTR) per CAN/ULC S770-03. The R-value at 180 day real-time age and 75°F mean temperature is commonly used to compare products and is the value printed on the product.
4. Values at yield or 10% deflection, whichever occurs first.
5. Values at yield or 5%, whichever occurs first.
7. ASTM E 84 is thickness-dependent, therefore a range of values is given.

Environmental and Sustainability

Owens Corning is a worldwide leader in building material systems, insulation and composite solutions, delivering a broad range of high-quality products and services. Owens Corning is committed to driving sustainability by delivering solutions, transforming markets and enhancing lives. More information can be found at www.sustainability.owenscorning.com.

Warranty

FOAMULAR® XPS insulation limited lifetime warranty maintains 90% of its R-value for the lifetime of the building and covers all ASTM C 578 properties. See actual warranty for complete details, limitations and requirements at www.foamular.com or www.owenscorningcommercial.com.
